

Value in Procurement of Large Scale Services

CITY OF PHOENIX, ARIZONA

Material Recovery Facility (MRF) Services

The City of Phoenix Public Works Department owns two facilities used to produce single stream recyclable material. The City partnered with ASU to re-compete the contract for facility operation services with the intent of improving performance and increasing revenues.

The City found the Best Value interview process to be highly successful in identifying

the expertise of bidders. Each team brought operations personnel for individual interviews and answered questions regarding their planned operation approach and risk minimization strategies.

The Value Added portion of the RFP process allowed the bidders to propose additional scope and services that would benefit the City. Due to this process, the awarded vendor was able to offer capital improvements valued at \$2.3 million to upgrade certain processing equipment.

Cost Impact: increased to \$80M net revenues

Value Added Impact: \$2.3M capital improvements

Type: Services

Vendor: ReCommunity

Location: Phoenix, Arizona

Contract: \$48,707,806

Start Date: December 2012

Duration: 10 years
