

Best Value Procurement

Thursday, March 01, 2012
9:00 AM - 11:00 AM

Located At:
Intermediate District 287
1820 Xenium Lane N. Room 316
Plymouth, MN 55441

SUMMARY

This session will introduce innovative best-value concepts and strategies in procurement and risk management. Mitigating risk, streamlining communication, and increasing efficiency will lead to high-quality design, construction, and professional services without the usual chaos and conflict. The ultimate goal is to have the vendor act in the best interest of the buyer.

This session will cover:

- Best Value Overview
- Selection Criteria
- Pre-Award Process
- Project/ Risk Management Plan
- What it takes to get started

Topic Highlights:

- What is Best Value? Why use it?
- Attract performing contractors/vendors, and individuals
- Learn to identify risks through non-technical information
- Minimize Risk & Set up a Weekly Reporting System
- Case Studies Results from other Minnesota owners

Dean T. Kashiwagi

Fulbright Scholar
Professional Engineer

INSTRUCTOR BIO:

Dean Kashiwagi is a professor at Arizona State University's Del E Webb School of Construction and also the Director of the PBSRG. Dean has developed a "hands off" approach to managing contractors or vendors in any industry. His concept is contrary to the traditional price-driven procurement model.

WHO SHOULD ATTEND?

Construction Directors
Facility/Project Managers
Procurement/Contracts staff
Owner's Rep.
Dept. Directors
IT Executives
Etc.
