

Table of Contents

Chapter 1 – Introduction “Seeking Simplicity”

Introduction	1-1
My Personal Background	1-1
Objectives of the Book	1-7
References	1-8

Chapter 2 – Information Measurement Theory (IMT), Coauthor Judy Kashiwagi

Information Theory	2-1
Information Measurement Theory (IMT)	2-2
Natural Laws	2-3
“Event”	2-4
Perception of Information and Processing Speed	2-5
Use of Dominant Info and Minimization of Decision Making	2-8
Conclusion	2-8
Chapter 2 Review	2-9
References	2-9
Attachment 2.1 – Theorems of IMT	2-10

Chapter 3 – Kashiwagi Solution Model (KSM)

Introduction	3-1
Information & The KSM	3-1
Decision Making & The KSM	3-2
Efficiency & The KSM	3-4
Experience, Emotion, Events & The KSM	3-4
Apparent Irony	3-6
Understanding our Environment Using KSMs	3-7
Understanding Individuals Using KSM's	3-9
Conclusion	3-10
Chapter 3 Review	3-10
References	3-11
Attachment 3.1 - "Japan Keeps a High Wall for Foreign Labor"	3-12

Chapter 4 – Decision Making and Dominant Information

Introduction	4-1
Experts Know How Little They Know	4-1
Decision Making is Not Needed When You Know What to Do	4-2
How Do You Know Who Knows When You Don't Know	4-2
Dominant Information	4-3
Conclusion	4-4
Chapter 4 Review	4-5

Chapter 5 – Who Is On My Molecule, Coauthor Dr. William W. Badger

Introduction	5-1
Who Is On My Molecule (WIOMM)	5-2
Conclusions	5-4
Chapter Overview: Key Lessons	5-5
Chapter 5 Review	5-5

Chapter 6 – Everything is at Equilibrium

Introduction	6-1
Equilibrium, Opposing Forces, Point of Space	6-3
Conclusion	6-4
Chapter 6 Review	6-4

Chapter 7 – Control and Influence, Coauthor Jacob Kashiwagi

Introduction	7-1
Impossible to Influence or Control Another Human Being, Entity, or Event	7-1
Dominant Examples of “No Control or Influence” Problem	7-3
Solution	7-4
Conclusion	7-4
Chapter 7 Review	7-5
References	7-5
	7-6

Chapter 8 – New Leadership Model of Alignment, Coauthor Jacob Kashiwagi

Introduction	8-1
Traditional Leadership Model	8-1
Construction Industry has a Lack of Leadership	8-2
New Leadership Model of Alignment	8-3
IMT/KSM Application to Leadership, Management, and Alignment	8-4
Leadership Experts	8-4
The New Alignment-Based Leadership Model	8-6
Creation of a New Measurement System and Leadership Model	8-7
Traditional Influence and Alignment: Best Value PIPS/PIRMS	
Survey Results	8-9
Conclusion	8-9
Jacob Kashiwagi 2007 Thesis "Leadership is Alignment and Not Influence"	8-10
Chapter 8 Review	8-11
References	8-11
Attachment 8.1: Harry Reynolds Description of LS and RS Characteristics	8-13

Chapter 9 – Integrating WIO MM, Leadership and Equilibrium Principles

Dominant IMT Models	9-1
Identifying the Initial Conditions	9-1
Getting Out of Silos	9-2
Cutting off the Source of Confusion Between Silos	9-3
Modified WIO MM	9-4
Answering the Questions	9-5
Conclusions	9-6
Chapter 9 Review	9-7

Chapter 10 – Services Industry Structure and Participants

Introduction	10-1
Solution by Simplicity	10-3
Services Industry Structure (SIS) Model	10-4
Quadrant I: Low-Bid Award or Price-Based Environment	10-4
Minimum Standards: No Relationship with Performance	10-6
Impact of the Low-Bid Award	10-10
Management and Control by the Owner's Representatives	10-17
Politics in Quadrant I	10-19
Capability of the Construction Industry to Sustain itself	10-20
Quadrant II: Best-Value Environment: "Win – Win"	10-21
Quadrant III: Negotiated-Bid Environment	10-22
Quadrant IV: Unstable Market	10-23
Conclusion	10-25
Chapter 10 Review	10-26

References	10-27
Attachment 10.1: Non Performance Articles	10-29
References	10-32
Attachment 10.2: Low Bid White Paper	10-34
Attachment 10.3: Quotes on Low Bid Construction	10-35
References	10-41

Chapter 11– Best Value Practices vs. Best Business Practices

Introduction	11-1
How to Implement a Best Value Solution	11-6
Conclusions	11-9
Chapter 11 Review	11-10
References	11-11
Attachment 11.1: NASA Articles	11-13
Attachment 11.2: Alternate Delivery Processes (ADP)	11-18

Chapter 12 – New Risk Management Model, Coauthor Pasis Mselle

Introduction	12-1
Traditional Risk Management Model	12-2
Source of Risk	12-3
Decision Making	12-4
New Risk Management Model	12-4
Paradigm Shift	12-6
Conclusion	12-7
Chapter 12 Review	12-8
References	12-8

Chapter 13 – New Contract Model, Coauthor Jacob Kashiwagi

Introduction	13-1
Problem	13-1
Solution	13-1
Existing Model	13-2
New Contracting Model	13-2
Conclusion	13-4
Chapter 13 Review	13-5

Chapter 14 – PIPS Best Value Concepts with the Price Based Award

Introduction	14-1
Problems with the Priced Based Environment	14-1
Implementation of PIPS Concepts in the Low Bid Environment	14-2
Additions to the Price Based Specification and Phase 1 Activities	14-4
Checklist of Changes that Need to be Made to the Price Bids	14-6
Conclusion	14-6
Chapter 14 Review	14-7

Chapter 15 – Professionals in the Best Value Environment

Difference Between High Performing Professionals and Low Performing Professionals	15-1
State of Today's Design Industry	15-1
Risks to Professionals	15-2
Best Value Process	15-2
Identification of Scope and Risk	15-3
Selection Criteria	15-3
Pre-Award Phase	15-5
Chapter 15 Review	15-6
Attachment 15.1: Case Studies and Lessons Learned	15-7
Attachment 15.2: Quick Explanation of Delivery Process of Designers	15-12
Attachment 15.3: Past Performance Information Collection	15-13

Chapter 16 – The State of the Professional Industry, Coauthor Geoffrey S. Child

Introduction	16-1
Problem Statement	16-1
Hypothesis	16-2
Methodology	16-2
Confirming the Price Based Environment of Designers	16-2
The Construction Industry Structure	16-3
PIPS (Performance Information Procurement System)	16-5
A/E/C Industry Survey	16-5
Survey Results	16-6
Conclusions and Recommendations	16-8
References	16-8

Chapter 17 – Movement to “Best Value” Using the FAR, Coauthor Kenneth Sullivan

Lessons Learned	17-1
Introduction	17-2
Federal Acquisition Regulation (FAR)	17-4
Obstacles in Using Best Value	17-6
Case Study with the U.S. Coast Guard	17-9
Case Study with the Corps of Engineers	17-13
General Services Administration (GSA) Heartland Region	17-17
Conclusion	17-18
Chapter 17 Review	17-19
References	17-19
Attachment 17.1: Article - “Seizing a \$400 Billion Opportunity	17-21
Attachment 17.2: Article – “Defense Acquisition”	17-23

Chapter 18 – Conclusion

Introduction	18-1
What is IMT?	18-1
What is the BV Approach	18-1
What is the Optimal Way to Become a BV Visionary	18-1
Mistakes of Traditional Best Practices: Managing, Directing and Controlling	18-1
Source of BV Approach	18-2
What is the Problem	18-2
The Solution: Help the Blind to See	18-2
Conclusion	18-3

Glossary

Index

IMT Figures/Tables

Chapter 2 – Information Measurement Theory (IMT), Coauthor Judy Kashiwagi

Figure 2.1: Number of Natural Laws	2-3
Figure 2.2: The Event	2-4
Figure 2.3: Cycle of Learning	2-5
Figure 2.4: Rate of Change	2-6
Figure 2.5: Rate of Change of Similar Individuals	2-8
Table 2.1: Differences in Individuals	2-7

Chapter 3 – Kashiwagi Solution Model (KSM)

Figure 3.1: Rate of Change and a Kashiwagi Solution Model	3-1
Figure 3.2: A Two-Way Kashiwagi Solution Model (KSM)	3-2
Figure 3.3: Perception of Multiple Outcomes	3-2
Figure 3.4: Decision Making	3-3
Figure 3.5: Information, Decision Making, and Efficiency	3-4
Figure 3.6: Experience, Expectation, Control, Emotion and Position	3-5
Figure 3.7: White Collared Criminal Minds Are Not Type A persons	3-7
Figure 3.8: Understanding Your Environment	3-8

Chapter 4 – Decision Making and Dominant Information

Figure 4.1: Know vs. Don't Know	4-1
Figure 4.2 (left): Someone Who Knows Nothing (Realistic)	4-2
Figure 4.3(Right): Someone Who Knows Everything (Impossible)	4-2
Figure 4.4: Find an expert who does know	4-3

Chapter 5 – Who Is On My Molecule, Coauthor Dr. William W. Badger

Figure 5.1: Who Is On My Molecule	5-1
Figure 5.2: Rate of Change Chart with KSM	5-2
Figure 5.3: Molecules placed on RCC	5-3
Figure 5.4: Using WIOMM Figures to Compare Entities and Risk Involved	5-4

Chapter 6 – Everything is at Equilibrium

Figure 6.1: Equal and Opposite Forces	6-1
Figure 6.2: Two Extremes of People	6-2
Figure 6.3: Environment Against Person	6-3

Chapter 7 – Control and Influence, Coauthor Jacob Kashiwagi

Figure 7.1a: No Influence model	7-1
Figure 7.1b: Influence Model	7-1

Chapter 8 – New Leadership Model of Alignment, Coauthor Jacob Kashiwagi

Figure 8.1: Current Development of Leadership	8-1
Figure 8.2: Traditional Leadership Model	8-2
Figure 8.3: Impact of Alignment on worker capability and productivity	8-6
Figure 8.4: Comparison between Traditional Leadership Model and the New Leadership Model.	8-6
Table 8.1: Results of Leadership Process Comparison Survey	8-9

Chapter 9 – Integrating WIOMM, Leadership and Equilibrium Principles

Figure 9.1: Silos	9-2
Figure 9.2: Modified WIOMM	9-4
Figure 9.3: Modified WIOMM C+ Constraint	9-5

Chapter 10 – Services Industry Structure and Participants

Figure 10.1: The Services Industry Structure (SIS) model	10-4
Figure 10.2: Performing Contractors	10-9
Figure 10.3a: Minimum Standard	10-10
Figure 10.3b: Impact of Minimum Standards	10-10
Figure 10.4: Owners vs. Contactors: Difference in Objectives	10-11
Figure 10.5a (Left): Best Value Procurement	10-12
Figure 10.5b (Right): Low Bid Procurement	10-12
Figure 10.6: Three different crews working for a contractor	10-14
Figure 10.7: Contractor Assignment of Crafts people	10-15
Figure 10.8: Major Functions of Quadrant I	10-18
Figure 10.9: Contracts and Warranties	10-25
Table 10.1: Example of How a Standard is Created	10-8

Chapter 11 – Best Value Practices vs. Best Business Practices

Figure 11.1: Industry Structure	11-2
Figure 11.2: Cockpit	11-8
Figure 11.3: CM@Risk, Best Practices	11-20

Chapter 12 – New Risk Management Model, Coauthor Pasis Mselle

Figure 12.1: Existing Risk Management Model	12-2
Figure 12.2: New Risk Management Model	12-5

Chapter 13 – New Contract Model, Coauthor Jacob Kashiwagi

Figure 13.1: Traditional Contracting Model of buyer and Vendor	13-2
Figure 13.2: New Contracting model of buyer and Vendor	13-2
Figure 13.3(Left): Traditional Contractor Delivery Requirement Model	13-3
Figure 13.4(Right): New Contract Delivery Requirement Model	13-3

Chapter 14 – PIPS Best Value Concepts with the Price Based Award

Figure 14.1: PIPS/Best Value Process	14-4
Figure 14.2: Price Based PIRMS Process	14-4

Chapter 15 – Professionals in the Best Value Environment

Figure 15.3.1: Survey Process	15-13
Figure 15.3.2: Survey Submittal Information	15-14
Figure 15.3.3: List of Reference Projects	15-15
Figure 15.3.4: Survey Questionnaire Example	15-17

Chapter 16 – The State of the Professional Industry, Coauthor Geoffrey S. Child

Figure 16.1: Construction Industry Structure	16-3
Figure 16.2: Min/Max Dilemma	16-4
Figure 16.3: Price-Based Award	16-4
Figure 16.4: Disagreement Between Clients and Designers	16-7

Chapter 17 – Movement to “Best Value” Using the FAR, Coauthor Kenneth Sullivan

Table 17.1: Overview of Process	17-15
---------------------------------	-------
